EDUCATION

Indiana University Bloomington, Luddy	May 2025
- <i>Bachelors of Science in Computer Science</i> - <i>Minor in Intelligent Systems Engineering</i> - Relevant Courses: <i>Applied Algorithms, Deep Learning and Hardware Acceleration</i>	
Heartland Community College, Illinois	May 2023
- <i>Associates of Science in Computer Science</i>	
Normal Community West High School, Illinois	May 2023
- <i>Computer Science Accelerated Associate's Degree Program</i>	

EXPERIENCE

State Farm	Normal, IL
<i>Enterprise Technology Software Engineer Intern/Part-Time/Full-Time</i>	Summer 2023/May 2024-May 2025/ Present
• Was tasked with redeveloping an internal API service to incorporate the usage of AWS components • Learned new first hand experiences with AWS and how it works in the real world along with a better understanding of REST Api and terraform • Was tasked with fixing and developing new components in the front and backend of the Salesforce system • Learned front and back end development of the Salesforce enterprise along with data management and Lightning Web Components	
Indiana University - Luddy Makerspace	Bloomington, IN
<i>Makerspace Technician</i>	Aug. 2023 – May 2025
• Tasked with maintaining all makerspace devices (3D printers, laser cutters, soldering stations, etc.) and making sure they are all working correctly • Responsible with teaching other students how to correctly use the makerspace devices while also supervising the entire makerspace	
Indiana University - Luddy Pacesetters	Bloomington, IN
<i>Pacesetters Events Team</i>	Oct. 2023 – May 2025
• Worked with a group of other Luddy students to design, coordinate and plan events to take place on campus • Goal of events is to promote diversity and inclusion in technology • Worked with events team to plan events and manage finances	
Indiana University - Peer Mentor	Bloomington, IN
<i>Luddy LLC</i>	Aug. 2024 – May 2025
• Responsible for a “buddy huddle” of students and helping them adjust to college life • Held events within the LLC to spark engagement and a closer community • Dependable and Responsible person who anyone could turn to for assistance	
Indiana University - Associate Instructor	Bloomington, IN
<i>Luddy School of Informatics, Computing and Engineering</i>	Aug. 2024 – May 2025
• Associate Instructor for the Intro to Engineering class. • Helped teach the class, grade assignments, and hosted my own office hours to assist students • Class consisted of around 80 students total and it was my responsibility to help make sure each student has a good understanding of the material	
Best Buy	Bloomington, IL
<i>Advanced Repair Agent</i>	Feb. 2023 – May. 2023
• Repaired hardware and software issues on client devices by performing diagnostic tests, troubleshooting issues till an issue was resolved • Included data transfers, clones of devices, hardware troubleshooting, as well as maintenance on apple devices	
Best Buy	Bloomington, IL
<i>Computer Sales Associate</i>	Nov. 2022 – Feb. 2023
• Assisted customers with finding the right device for their specific circumstances and use cases • Answered customer questions on a multitude of devices ranging from windows machines, to cameras, to apple devices	
STEM Project POS System	Normal, IL
<i>Lead Software Developer and Team Lead</i>	August. 2021 – Dec. 2022
• Developed a working prototype POS system involving a sql database for use in a school environment	

- Included multiple administrative functions to the POS system including full transaction history, product management, and account management

Computer Science K-8 Night

NCWHS; Normal, IL

Python Instructor

Dec. 2021

- Led classes of 15-20 students through a Python learning experience to get them engaged and learn how to code in Python programming language
- Mentored and provided resources for students to go from little to no Python experience to a working product

INVOLVEMENT

STEMPosium

Nov. 2025

State Farm STEM Involvement

- Created new Technology Lab from the ground up focused on teaching 8th graders how to code and how to apply problem solving and teamwork skills to achieve a common goal
- Designed full outline for future use and worked alongside other volunteers to help event run smoothly

Luddy Living Learning Center

Indiana University

Luddy School of Informatics, Computing and Engineering Direct Admit

- My advanced skills in computer science allowed me to be selected as a direct admit into the Luddy Living Learning Center
- Chosen as 1 of 150 admits selected out of a freshman class of over 8,000 students

Vice President, Luddy Makerspace Club

Aug. 2024 – May 2025

- Responsible for helping rebuild the Makerspace Club from the ground up.
- Held events within the Luddy LLC and throughout Luddy.
- Taught students and peers about the makerspaces and how to effectively use the different tools.

President, Computer Science Honor Society

Aug. 2022 – May 2023

- Held the responsibility of holding meetings, planning events, and running all things computer science related within the school
- Tasked with assisting not only students but faculty within the school with any technology related issues.

Drum Major, Normal Marching Band

May 2021 – May 2023

- Made sure that all equipment was set up on time and in the right place as well as made sure the band and leadership team were all where they were supposed to be at the right times
- Learned how to manage people to ensure deadlines get hit as well as how to push others towards a common goal

PROJECTS

Campaign Retrieval ROSA API

Nov. 2025

State Farm ET

- Rebuilt and refactored entire Campaign Retrieval API; focused on efficiency and resource management
- Found vulnerabilities and resource leaks in previous AWS api; made the proper changes to fix them accordingly
- Worked with BPs and external vendors to make transition to new API smooth and seamless

Campus-wide 3D Printing Course

Fall 2024

Indiana University

- Tasked with creating a course to teach about the safety and usage of the 3D Printers on campus
- Course is used in multiple classes as part of curriculum

STEM Project POS System

Aug. 2021 – Dec. 2022

Lead Software Developer and Team Lead

- Developed a working prototype POS system involving a sql database for use in a school environment
- Included multiple administrative functions to the POS system including full transaction history, product management, and account management

Skills

Technical: Java; Python; JavaScript (REST Api); C#; Git

Professional: Flexible, Quick Learner, Problem Solving, Responsible, Organized, Independent, Cooperative
